SHAPE THE FUTURE OF EDUCATION AND WORK

SUPPORT YOUNG AUSTRALIANS

Join the IDEA ecosystem

IDEA works with an international network of education providers, entrepreneurs, businesses, industry, NFPs, higher education and government.

We share an interest in the future of education and work. We collaborate to provide young people with access to world leading innovations and learning opportunities.

We advocate for systems change in education, so that all young Australians can reach their full potential.

IDEA provides a structure and mission around which an ecosystem of people and organisations can gather.

MENTORS

Mentors can help young people to explore their interests and unlock their potential. They can have a profound impact on a young person's life. We seek to match our students with mentors who can support them on their learning journey.

INTERNSHIPS

We want students to experience the world of work and shape their career and study pathways in response. We connect young people with organisations who can help them to explore different career possibilities as part of our work integrated learning program.

We also take on interns who want to learn more about IDEA and contribute to our mission.

Can you or your organisation contribute to our growing ecosystem?

HOW WE WORK WITH IDEA PARTNERS

PARTNER PROGRAMS

IDEA is a human-centred, adaptive organisation. We respond to student needs and co-design bespoke learning experiences. To do this at scale, we partner with people and organisations who can support our students on their learning journeys.

RESEARCH AND ADVOCACY

We partner with higher education and research-driven organisations to measure our social and systemic impact. This feeds into our advocacy work.

We collaborate to shape and drive a systems change agenda in education.
