IDEA SUPPORTS SCHOOLS TO ACHIEVE THEIR VISION FOR CHANGE

IDEA understands the complex system that schools operate within.

The IDEA team has firsthand experience of the challenges faced by teachers and school leaders looking to strike a balance between regulatory obligations and the expectations of students, parents and stakeholders in a changing world.

IDEA is a part of the emerging culture of innovation and change in WA schools. We want to support schools as they shift into the future. We do this by bridging the gap between the current system and the connected ecosystem that we envisage for the future of education.

CAPACITY BUILDING

We offer professional learning in human-centred curriculum design and learning experience design. We support teachers to implement these strategies in their planning. We work with our partners to coordinate further professional learning appropriate to your needs.

SUPPORTING TRANSITIONS

We provide students with opportunities to engage in learning that extends beyond the classroom. We offer work integrated learning, IDEA and partner programs. We support students to build their learning portfolio for a seamless transition from school to higher education and work.

Our approach is co-designed with and for your school.

Contact us with your project brief and to learn more.

IDEA SUPPORTS SCHOOLS TO GROW THEIR EDUCATION ECOSYSTEM

STRATEGIC PLANNING

We work with school leadership teams to develop and implement their innovation strategy.

BROKERING PARTNERSHIPS

We broker partnerships between schools, higher education providers, community organisations and industry partners, that benefit the school community.

IDEA @ YOUR SCHOOL

Want to launch an IDEA in your school? We work with you to tailor the IDEA model to your school context and the needs of your student cohort.
