2021 Program

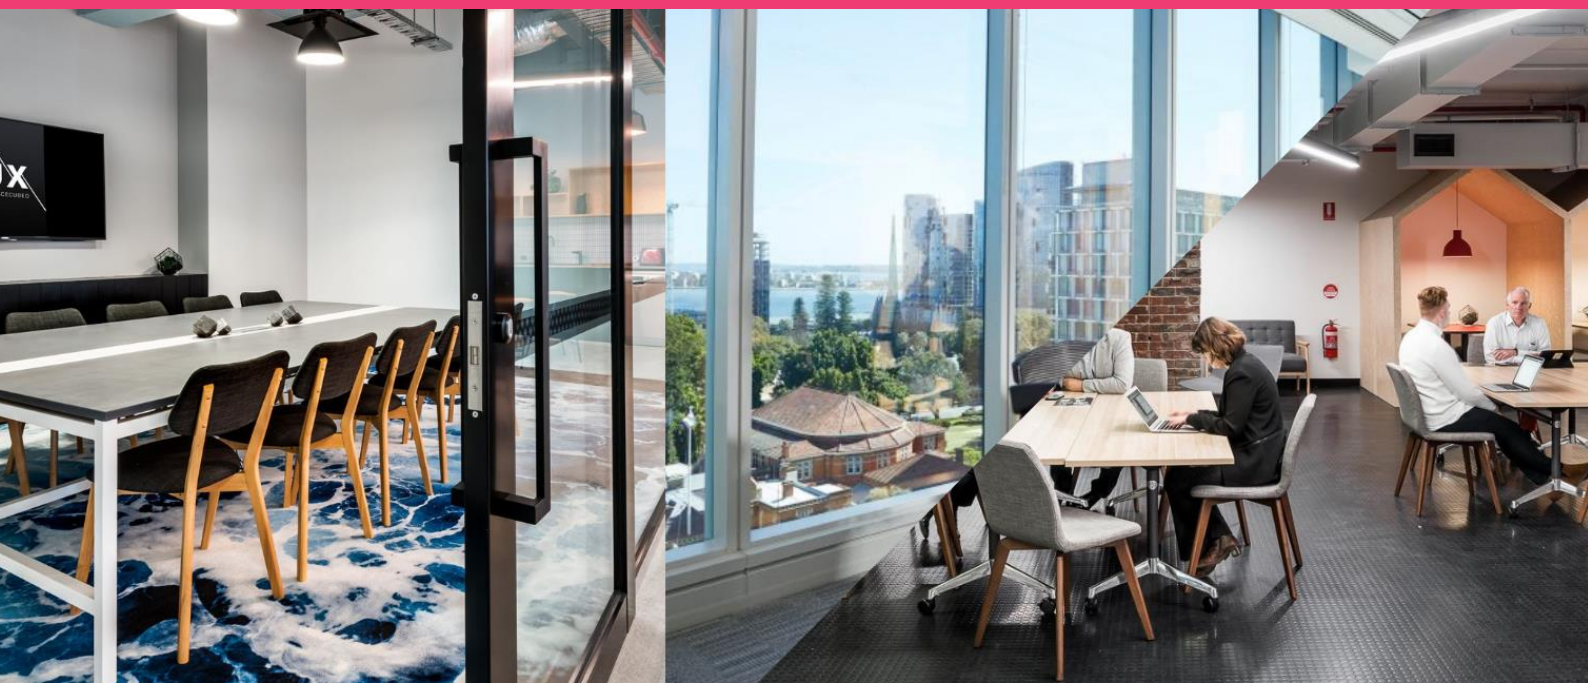

Empowering young people to create the future.

The world is changing.

Young people have the opportunity to design innovative solutions to the world's complex problems. They will be the creators of new technologies and enterprises. They will disrupt traditional workplaces and merge old and new ways of thinking. They are ready to shape the future.

Our program focuses on the development of 'future-ready' skills in interest-driven projects that are designed around each student. We support young people to navigate their senior secondary years with confidence, gaining meaningful credentials that are relevant to the future of work. We encourage students to adopt a strategic approach to career design and a try-before-you-buy attitude to higher education and employment. We immerse students in experiences that are relevant to their interests and aspirations while building their learner portfolio with nationally recognised qualifications.

In partnership with the [Spacecubed Foundation](#), IDEA's WA campus is located in a versatile, open working space in Perth CBD, with high exposure to business, higher education and the start-up community.

Our Program

In 2021, IDEA is launching our Future Ready and Pathways programs.

- × **IDEA Future Ready Program:** This one day/week program combines work placement in Perth's business and start up community with a VET qualification (Option 1: Certificate III in Business, Option 2: Certificate IV in Business).

[LEARN MORE AND APPLY](#)

- × **IDEA Pathways:** Pathways offers tailored advice, guidance and pathway brokering to help young people design and navigate career and learning pathways with success.
